

Biocore : research program for a sustainable bio-refinery model.

Pour : INRA Toulouse

Date : 2010 - 2013

Région : Europe - **Domaine** : Agroecology

Biocore is a research program for a sustainable bio-refinery model that was launched in the context of the European commission's 7th framework program for Research and Development. The idea is that bio-refineries can just as well transform wheat or rice straw, as residue from forests or wood resulting from short rotation coppice.
