

Agriclimatchange : fighting climate change in agriculture

Pour : DG Environment

Date : 2010 - 2013

Partenaires : Fundacion Global Nature (ES), Comunita Montana (IT), Bodensee Stiftung (ALL), Region de Murcia (ES)

Région : Europe - **Domaine :** Agroecology

"The aim of the AgriClimateChange project is to contribute to making the European farming sector an international leader in the fight against climate change, taking into account the key role that farmers play in a sector at the intersection of different needs: food production, but also the protection of biodiversity, of a certain heritage, of landscapes ... and of the climate."
