

## **BioBio** : development of indicators regarding the links between low level input farming and biodiversity.

**Pour** : DG Research and innovation - Horizon 2020

**Date** : 2009 - 2012

**Partenaires** : ART (Coordinateur du projet)

**Région** : Europe - **Domaine** : Agroecology

The interest of citizens, farmers and politicians for the preservation of biodiversity on farms is in progress. This is the context in which the 2009 BioBio project was launched: « biodiversity indicators in organic and low level input agricultural systems ». Read more: <http://www.biobio-indicator.org/>
