

BioBio : development of indicators regarding the links between low level input farming and biodiversity.

Pour : DG Research and innovation - Horizon 2020

Date : 2009 - 2012

Partenaires : ART (Coordinateur du projet)

Région : Europe - **Domaine** : Agroecology

The interest of citizens, farmers and politicians for the preservation of biodiversity on farms is in progress. This is the context in which the 2009 BioBio project was launched: « biodiversity indicators in organic and low level input agricultural systems ». Read more: <http://www.biobio-indicator.org/>
