

QuESSA : quantifying ecosystem services for sustainable agriculture

Pour : DG Research and innovation - Horizon 2020

Date : 2013 - 2017

Partenaires : Game & wildlife conservation trust (GWCT) -
coordination du projet

Région : Europe - **Domaine** : Agroecology

QuESSA is a European collaborative research project that was born in a context of political reflection about the support of new tools that would favor the sustainability of farming systems. QuESSA aims to quantify the contribution of semi-natural habitats to providing vital eco-systemic services for sustainable farming.
